

ChemGrout®

We at ChemGrout look forward to returning to Geofluid, the most important international event for Drilling and Foundations. The exhibition has always enabled us to have the important face-to-face contact with potential customers, and strengthen our presence within the industry.

With more than 57 years of experience, ChemGrout manufactures the world's largest selection of grouting equipment. Based in LaGrange Park, Illinois, USA, we offer both colloidal and paddle type grout mixers, as well as a variety of grout pumps, including piston, plunger and progressing cavity. Outputs range up to 52 GPM and pressures to 2000 PSI. Complete integrated mixing and pumping units are available in a variety of power options, including air, electric, electric/hydraulic, gasoline and diesel/hydraulic. Offering many unique and innovative features, ChemGrout has remained an industry leader in grouting equipment since 1963. Contact us at www.chemgrout.com.
