

Global partner for innovation  

IMET was founded in 1988 and is a pioneer in the design and manufacture of **industrial safety radio remote controls**.

Today IMET can boast a very wide range of transmitters and receivers, capable of suiting the majority of requirements of remote control inside industrial, construction, agricultural and "mobile" in general.

TITAN

The new model with an ergonomic design for endless applications. This new radio remote control provides the possibility to create infinite personalization: 110 commands among analog and digital, data feedback on LEDs or on 4,3" color display.
